

METOSET INJECTABLE CONCRETE REPAIR

SANDABLE
PAINTABLE

METOLUX Metoset Concrete Repair is a two-component, ready to use, rapid curing, concrete repair resin used for cracks and sealing joints in almost any surface.

This formula is for outdoor or indoor use, and is very versatile. May be applied to slightly damp surfaces without any preparations. Ensures a seamless repair.

Key Benefits:

- Easy to mix and easy to apply
- Styrene free for use indoors or outdoors (low odour)
- Excellent structural characteristics
- Stronger than cured concrete
- High surface abrasion resistance
- Cures down to -10°C
- Repairs to large cracks in concrete typically cementitious surfaces
- Masonry restoration
- Jointing and bonding
- Chipped edges
- Paintable and coatable
- Bonds most construction materials
- Re-usable unit
